

8-1 Trade value by region and production

- The Asian region represents a large portion of both exports from and imports to Kansai, in comparison to the Japan total, and thus Kansai has become a central Asian hub.
- Electric appliances, machinery and chemical products constitute a high percentage of exports from Kansai because many global manufacturers in the fields of machinery (home appliances, motors, construction/agricultural machinery, etc.) and chemical products (medical products, plastics etc.) are located in the region.
