Main Businesses/Contents

- Appeal points
We have communication and AI technology acquired through game development. Positioning it as our core technology, we deploy the metaverse platform XR Cloud. This technology frees people from the constraints of where they live and is expected to become the next generation of social infrastructure. Our mission is to create the future of entertainment and society in the metaverse.
- XR business overview
Deployment of the metaverse platform XR Cloud for business users.

4. Our strength in experience design acquired through 20 years of operation: As a company that has been working on not only XR but also web production and real event projects for 20 years, we have a great strength in experience design. In recent years, it has become possible to deepen the experience by linking with generative AI.
