

ENGINE FORUM KOBE Results Overview

Kansai Aircraft Industry Platform NEXT

Period

Tuesday June 11 - Wednesday 12 June 2024

Venue

Kobe International Exhibition Hall 3

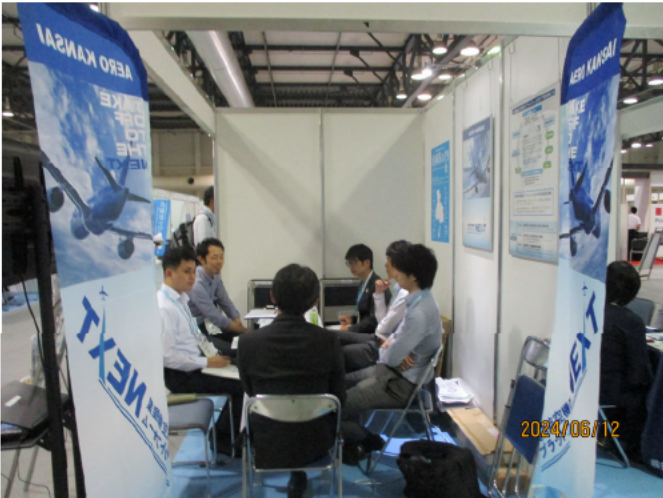

● Purpose of participation

At the Kobe Engine Forum, a renowned international exhibition and business meeting specializing in aero engines and industrial gas turbine engines, we support the creation of business opportunities between overseas buyers and domestic suppliers, deepen networking with aircraft-related businesses that gather from all over the country, and also conduct exchanges with students of technical colleges. The program also aims to develop human resources who will lead the aerospace industry in the future.

● Main outcomes

- Overseas buyers from the USA, Germany, Italy, India, Taiwan and other countries participated, and interviews were held mainly with exhibitors from Hyogo Prefecture.
- The exhibition also included visits from regional METI offices in Hokkaido, Chubu and other prefectures, as well as local governments outside the Kansai region (Okinawa, Nagasaki and others), which led to much networking.
- A tour by about 30 students from Kobe's technical colleges was also organized and implemented, giving them the opportunity to come into contact with local companies.
